

# Tackling the Plastic Crisis in The Gambia

---

**PRECIOUS PLASTIC GAMBIA**

# The Problem

---

Plastics are seriously impacting the environment and many livelihoods in The Gambia:

- Fishermen - reduced catch rate
- Oyster farmers - plastic entwined in roots of mangrove trees
- Farmers and shepherds - cattle and livestock are consuming plastic
- Local markets - plastic blocks gutters and causes flooding during the rainy season

# The Solution

*“Turning waste  
into another  
person's  
treasure!”*

- Precious Plastic Gambia

# Who are we?

GROWING GREEN  
COMMUNITIES

+

GUNJUR PLASTICS

+

PLASTICS RECYCLING GAMBIA

= PRECIOUS PLASTIC GAMBIA

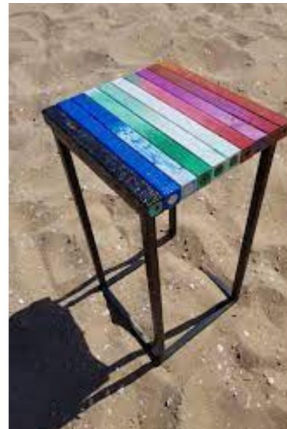

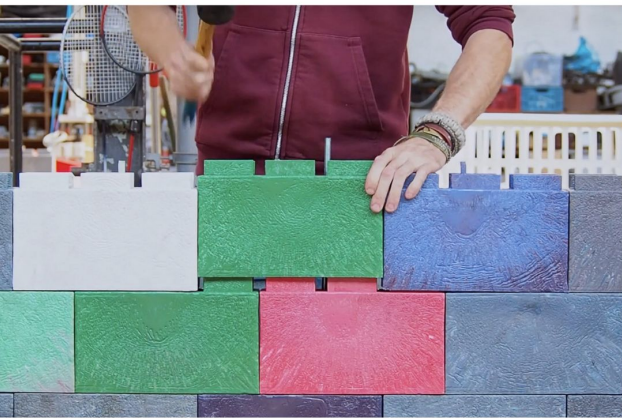

# Objectives

- Create a thriving, plastic recycling market
- Improve environmental education in the country
- Become a leading example of sustainable waste management in The Gambia
- Provide employment to hundreds of local community members
- Improve the cleanliness and health of the country
- Reduce plastics in the ocean and therefore save marine life

# Machines & Products
